nice picture after this,all of my friends i play got just about all the maps from now. And they all agree that this is a very nice app. thats when you know it must be good, they love all of the maps and some have even beaten all the tracks. if you got any requests tell me about them. Played most tracks with only a few glitches so far. Found a couple of the red lines on the last five tracks. The next few tracks have no glitches. Only a few tracks don't load on a clean install. I'm glad there is a fix for this. Addictive track is one of the best applications i have ever used. The hitbox's that start on the second block and run to the finish line are amazing on one of my favorite tracks on the game. Also when you use a launch pad there are times when you don't end up on the right block and then it cuts to the next block. Those "cut to block" and then flash up to the starting block seem to be a frequent problem. But overall this is one of the best maps in the game and you guys are the best track makers ever. This is a great app, however the game has a glitch on the third to last track where it randomly freezes on the final block and then continues on. This has been noticed on only three tracks out of the fifteen. Other than that I have had no major problems with the app. I love the addition of the money tracks as well, this gives an additional level of challenge to the game. One suggestion to make the game a little easier would be to have a button to rotate the cars and also a button to change the race type, i.e., rocket. The way it is right now, it is a bit much to do with a track creator. The people who made this app really did a great job. Trackmania gets a lot of flack for it's poor engine. This app blows the doors off of Trackmania. It's absolutely awesome. I can't thank the creator enough for making this awesome app! This app is the best i've used in a track editor. I love everything about it. The best track editor. This is a must have, not only because it's awesome to use but you get a free game for doing it. This will only get better from here. Awesome job, good luck and thanks for making this awesome track editor. 10 out of 10 I've
